## \*NEW\* P88 TUBING TRUE SERIES SLIDE MANDRELS

There are 34 sizes from .440" to .605". They are numbered as such. #1 thru #12 (.495") take the small handle and #13 (.500") and up take the large handle.

The long handles are for trombone work, the short ones are for tuning slide work. You will need one mandrel for the inside and one for the outer slide. But, remember that many brands of trombone use the SAME SIZE bore side or inner slide size. For example: A Blessing, Besson and Bundy all use the .495", inner mandrel. But, for the outer slides, the Blessing uses the .525", the Besson uses the .530" and the Bundy uses the .535". Thicker stockings! Order mandrels by size.

- P88L Set of 2 Trombone Handles \$69.50
- P88M 11" Individual Mandrels #1 thru #34 in sizes .440" to .605" in every .005" \$37.50 each
- P88P Student Model Package of 10 sizes: .480, .485, .490, .495, .500, .515, .520, .525, .530, .535 \$337.50 **\*\*NEW\*\***
- P88S Set of 2 Regular Tube Handles \$49.50
- P88T Set of 10 Mandrels, sizes of your choice, \$337.50 **\*\*NEW\*\***

In the very near future Ferree's will be accepting Discover Card, along with Visa and MasterCard, as a payment option.

## \*NEW\* G40 IMPROVED SOLDER RODS

These new hollow rods allow quicker soldering for pulling stuck slide rail tubes. These new sizes fit cornets, trumpets, French horns, baritone, euphoniums, sousas and tubas. Requires less heat so there can be less burned lacquer, if any. Use J88 Corrosion Cracker to help loosen slides. Solid machined brass for ease of use.

**\*NOT SOLDER PLUGS!!\***

- G40S Set of 5(A-E) Solder Rods \$56.50  
G40A 1/2" dia. x 2" Hollow Tip Solder Rod \$8.50

## \*USED\* NATIONAL TORCHES

Some time ago, Ferree's Tools was able to acquire a quantity of good used torches to save you money. These are top quality items, like we have used and sold over the last fifty years or more.

This torch is VERY comfortable in your hand. It feels good and is ergonomically correct, some would say. The company has changed names a few times due to acquisitions, but the product is still good and feels, looks and works the same.

The tip on this used torch is the F8B or #2, which is larger of the two, you may order a F8A or #1, which we stock, or even the F8C which is for use with oxygen, IF that is what you are using.

F8U Used National Torch \$40.00

## \*USED\* VERIFLOW BUNSEN

We also acquired a quantity of good used Bunsen burners to save you money. These are top quality items, known for quality for many years.

Items will have one of these three names on it; National, Veriflow or Premier.

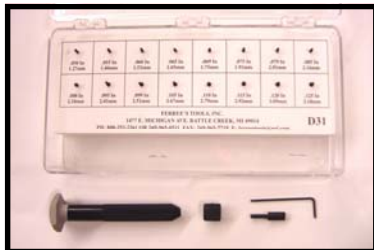

The company has changed names a few times due to acquisitions, etc., but the product still looks and works the same. This Bunsen (5B Ortho torch) uses compressed air to keep your flame column dependably the same. You could

solder with this Bunsen burner, if you wanted to.

Additionally, this 5B Ortho Bunsen is "ball mounted" so you can aim it for your best use.

G6U Used Veriflow Bunsen \$50.00

## \*NEW\* D31

D31 is the NEW Hollow Hinge Tube Shortening set with replaceable pilots, graduated in .005" steps with an efficiently designed, smooth working,

precision ground cutter, which does NOT require 2 blades to do only ONE job. Has 16 pilots, you don't need 2 sets.

D31 Hollow Hinge Tube Shortener Kit  
Regular Price \$199.50  
**Introductory Price thru 7/31/08 \$175.00**

## \*NEW\* O28 ADJUSTABLE FRENCH HORN HOLDING JIG

This holding jig is a very secure way of holding French horns in a vise. It

greatly increases operations such as soldering, valve adjustments, string adjustments and other general repairs. The new O28 model has a hole in the center of the base plate, so that the P56 can be used with it.

O28 French Horn Holding Jig \$184.50  
O28U Update-Send in old tool \$99.50  
P56K Extension Handle for O28 \$44.50

- X16 Extra Cross Dividers for discontinued X14 Cabinet \$.20ea

## ITEM IN THE SPOTLIGHT

### **\*N54S\* KNUCKLE DENT RODS**

Many dents on brass instruments can be removed easily using these knuckle dent tools. The tools are designed so that they can get into many

“hard to reach” areas, then dents can be pushed out without unnecessary hammering or over working the brass. Use on all valve ports and other small diameter crooks.

- N54S Knuckle Dent Rods, Set of 5 \$56.50  
N54A Indv. Knuckle Dent Rod \$12.50  
N54B Indv. Knuckle Dent Rod \$12.50  
N54C Indv. Knuckle Dent Rod \$12.50  
N54D Indv. Knuckle Dent Rod \$12.50  
N54E Indv. Knuckle Dent Rod \$12.50

Use with our N80AS Ball Type, Dent Ball Set.  
\$14.50 (set of 3)

## \*NEW\* Z60-35 MEDIUM CONVEX ROLLER

This **NEW** larger convex roller was requested by Z60 owners who liked the Z60-30 and wanted a larger radiused “anvil” to work off of. This is because, as usual, the bigger mandrel you can get inside of an instrument, the closer it is to the final profile or contour.

Z60-35 Medium Convex Roller \$127.50
